## Environmental policy statement

Our Environmental Policy statement is the communication of our policy internally within our organisation and externally to our customers and suppliers.

We understand the principals involved and have accepted responsibility for the pollution generated by our Company, the first step on the journey towards sustainability is to create a written commitment in the form of an Environmental Policy Statement.

This should acknowledge the reasons for doing it, to be specific and achievable and clearly written for an audience of staff, suppliers, customers and general public. It signed by our director to demonstrate that it is a Company Policy and reviewed at regular intervals.

**Principle Construction Ltd.** is committed to leading the industry in minimising the impact of its activities on the environment.

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Minimise toxic emissions through the selection and use of its fleet and the source of its power requirement.
- Actively promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.
- Seek to use an accredited program to offset the greenhouse gas emissions generated by our activities.

Our key operational commitments are to:

- Reduce our waste, divert waste away from landfill and enhance our reuse and recycling programmes.
- Continue to measure and reduce our carbon footprint, seek alternative renewable energy solutions and improve our vehicle fuel efficiency
- Better understand our products environmental footprint and where we can act for the biggest impact.
- Develop and deliver environmental training to enhance the knowledge and skills of our colleagues.
